CONTENTS

Volume 6 **1962**

Pages

AURORA, SILVIO, On connected normed algebras whose norms satisfy a reality condition. 488–499

BATEMAN, PAUL T. and DUQUETTE, ALFRED L., The analogue of the Pisot-Vijayaraghavan numbers in fields of formal power series. 594–606

BATEMAN, PAUL T. and GROSSWALD, EMIL, Imaginary quadratic fields with unique factorization. 187–192

BATEMAN, PAUL T. and STEMMLER, ROSEMARIE M., Waring's problem for algebraic number fields and primes of the form $(p^r - 1)/(p^d - 1)$. 142–156

BERGER, M., An extension of Rauch's metric comparison theorem and some applications. 700–712

BERSTEIN, I. and GANEA, T., On the homotopy-commutativity of suspensions 336–340

BLACKBURN, NORMAN, Some remarks on Černikov p-groups. . . . 421–433

BLUMENTHAL, R. M. and GETOOR, R. K., The dimension of the set of zeros and the graph of a symmetric stable process. 308–316

BLUMENTHAL, R. M., GETOOR, R. K., and MCKEAN, H. P., JR., Markov processes with identical hitting distributions. . . . 402–420

CHASE, STEPHEN U., Locally free modules and a problem of Whitehead. 682–699

CHU, HSIN, On universal transformation groups. 317–326

DE BRUIJN, N. G., On the number of integers $\leqq x$ whose prime factors divide n. 137–141

DUBINS, LESTER E., Rises and upcrossings of nonnegative martingales. 226–241

DUQUETTE, ALFRED L., with BATEMAN, PAUL T., The analogue of the Pisot-Vijayaraghavan numbers in fields of formal power series 594–606

ECKMANN, B. and KLEISLI, H., Algebraic homotopy groups and Frobenius algebras. 533–552

Pages

ERDÖS, P., On a theorem of Rademacher-Turán. 122–127

ESTERMANN, T., Another proof that bounded modular functions are constants. 128–130

FARRELL, R. H., Representation of invariant measures. 447–467

FELDMAN, JACOB, Feller and Martin boundaries for countable sets. . 356–366

GANEA, T., with BERSTEIN, I., On the homotopy-commutativity of suspensions 336–340

GARSIA, A. M., OREY, S., and RODEMICH, E., Asymptotic behavior of successive coefficients of some power series. 620–629

GETOOR, R. K., with BLUMENTHAL, R. M., The dimension of the set of zeros and the graph of a symmetric stable process. 308–316

GETOOR, R. K., with BLUMENTHAL, R. M. and MCKEAN, H. P., JR., Markov processes with identical hitting distributions. 402–420

GORENSTEIN, DANIEL and WALTER, JOHN H., On finite groups with dihedral Sylow 2-subgroups. 553–593

GREEN, J. A., The modular representation algebra of a finite group. 607–619

GRIFFITHS, PHILLIP A., On a theorem of Chern. 468–479

GROSSWALD, EMIL, with BATEMAN, PAUL T., Imaginary quadratic fields with unique factorization. 187–192

HERMANN, ROBERT, Some differential-geometric aspects of the Lagrange variational problem. 634–673

HIGMAN, D. G., Flag-transitive collineation groups of finite projective spaces. 434–446

HOCHSCHILD, G. and KOSTANT, B., Differential forms and Lie algebra cohomology for algebraic linear groups. 264–281

HOCHSCHILD, G. and MOSTOW, G. D., Cohomology of Lie groups. . 367–401

ITO, NOBORU, On a class of doubly transitive permutation groups. . 341–352

JOHN, FRITZ, The initial value problem for Maxwell's equations for two media separated by a plane. 157–172

KLEISLI, H., with ECKMANN, B., Algebraic homotopy groups and Forbenius algebras. 533–552

KNOPP, MARVIN ISADORE and LEHNER, JOSEPH, Correction to "On complementary automorphic forms and supplementary Fourier series" 713

Pages

———, On complementary automorphic forms and supplementary Fourier series 98–106

KOHLS, CARL W., A representation theorem for transformations of rings of continuous functions. 674–681

KOSTANT, B., with HOCHSCHILD, G., Differential forms and Lie algebra cohomology for algebraic linear groups. 264–281

LEHNER, JOSEPH, Two theorems on automorphic functions. . . . 173–176

LEHNER, JOSEPH, with KNOPP, MARVIN ISADORE, Correction to "On complementary automorphic forms and supplementary Fourier series" 713

———, On complementary automorphic forms and supplementary Fourier series. 98–106

LITTLEWOOD, J. E., On the mean values of certain trigonometrical polynomials II. 1– 39

MCKEAN, H. P., JR., with BLUMENTHAL, R. M. and GETOOR, R. K., Markov processes with identical hitting distributions. . . . 402–420

MACKEY, GEORGE W., Point realizations of transformation groups. . 327–335

MANN, HENRY B., An inequality suggested by the theory of statistical inference. 131–136

MAZUR, BARRY, Symmetric homology spheres. 245–250

MEYER, P. A., A decomposition theorem for supermartingales. . . 193–205

MOISE, EDWIN, Periodic homeomorphisms of the 3-sphere. . . . 206–225

MORDELL, L. J., The sign of the Gaussian sum. 177–180

MOSTOW, G. D., with HOCHSCHILD, G., Cohomology of Lie groups. . 367–401

NEWMAN, MORRIS, Congruences for the partition function to composite moduli 59– 63

———, The structure of some subgroups of the modular group. . . 480–487

OBATA, MORIO, Conformal transformations of compact Riemannian manifolds 292–295

OREY, S., with GARSIA, A. M. and RODEMICH, E., Asymptotic behavior of successive coefficients of some power series. 620–629

POSNER, EDWARD C., Diophantine problems involving powers modulo one 251–263

RIBENBOIM, P., On the decomposition theory for Krull valuations. . 524–532

Pages

RODEMICH, E., with GARSIA, A. M. and OREY, S., Asymptotic behavior of successive coefficients of some power series. 620–629

ROSSER, J. BARKLEY and SCHOENFELD, LOWELL, Approximate formulas for some functions of prime numbers. 64– 94

SAH, CHIH-HAN, Existence of normal complements and extension of characters in finite groups. 282–291

SCHOENBERG, I. J., On two theorems of P. Erdös and A. Rényi. . . 53– 58

SCHOENFELD, LOWELL, with ROSSER, J. BARKLEY, Approximate formulas for some functions of prime numbers. 64– 94

SEGAL, I. E., Mathematical characterization of the physical vacuum for a linear Bose-Einstein field (Foundations of the dynamics of infinite systems III). 500–523

SISTER MADELEINE SOPHIE, A note on the groups of order thirty-two. 630–633

STEMMLER, ROSEMARIE M., with BATEMAN, PAUL T., Waring's problem for algebraic number fields and primes of the form $(p^r - 1)/(p^d - 1)$. 142–156

SZEGÖ, GABOR, On positive harmonic polynomials. 181–186

TAFT, E. J., Uniqueness of invariant Wedderburn factors. 353–355

TURÁN, P., On Lindelöf's conjecture concerning the Riemann zeta-function 95– 97

WALTER, JOHN H., with GORENSTEIN, DANIEL, On finite groups with dihedral Sylow 2-subgroups. 553–593

WARD, MORGAN, The linear p-adic recurrence of order two. . . . 40– 52

WHITEMAN, ALBERT LEON, A family of difference sets. 107–121

WILF, HERBERT S., The radius of univalence of certain entire functions 242–244

WRIGHT, FRED B., Convergence of quantifiers and martingales. . . 296–307
